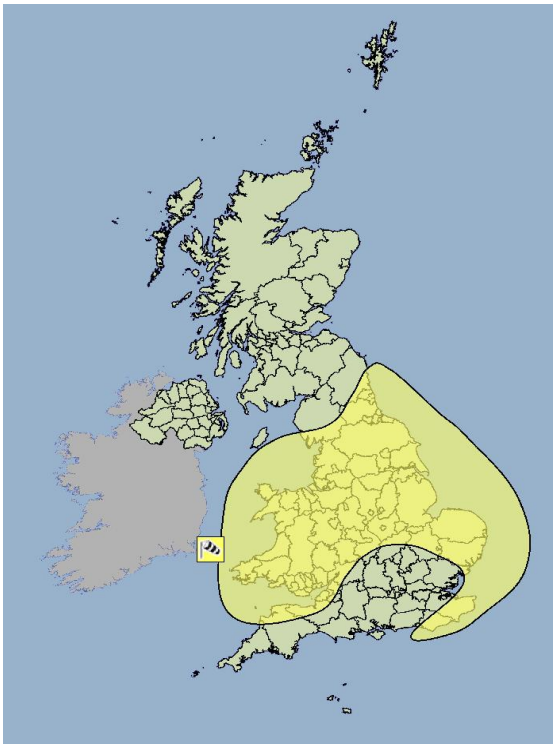
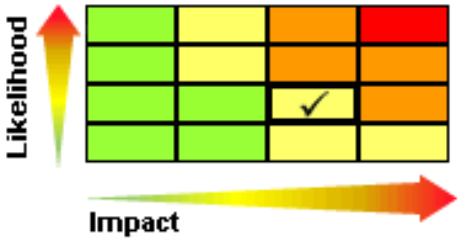
National Severe Weather Warning Service





Chief Forecasters Assessment
Gales and local severe gales are expected to arrive in the west of the region later on Tuesday evening and move eastwards overnight.

Heavy rain will be an additional hazard, especially in the north of the warning area, resulting in especially difficult driving conditions.

This warning has been expanded further south across Wales and also includes the far southeast of England, whilst the strongest winds are now less likely to affect Northern Ireland, Southern Scotland and the far north of England, so these areas have been removed.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **20:00 on Tue, 12th Sep 2017** until **10:00 on Wed, 13th Sep 2017**

Storm Aileen is expected to bring very strong winds with gusts of 50-60 mph on Tuesday night and into Wednesday morning. The worst of the winds, with gusts to 65-75 mph, are expected to be across North Wales, southern parts of Northern England, the North Midlands and Norfolk, for which area a separate Amber warning is being issued.

Longer journey times by road, rail and air are likely, with restrictions on roads and bridges. There is also a chance of power cuts, and damage to trees and perhaps buildings. Along windward-facing coasts, some wave overtopping is possible.
